Contents

Strategies for resolving inter-class data conflicts in mixed real-time database systems
K.-Y. Lam, T.-W. Kuo and T.S.H. Lee 1

Maintaining security and timeliness in real-time database system
Q.N. Ahmed and S.V. Vrbsky 15

The impact of component architectures on interoperability
L. Davis, R.F. Gamble and J. Payton 31

Experiences with ALMA: Architecture-Level Modifiability Analysis
N. Lassing, P. Bengtsson, H. van Vliet and J. Bosch 47

An estimation of the decision models of senior IS managers when evaluating the external quality of organizational software
B.B. Anderson, A. Bajaj and W. Gorr 59

An XML approach for legacy code reuse
Y. Bi, M.E.C. Hull and P.N. Nicholl 77

SigDAQ: an enhanced XML query optimization technique
S. Park and H.-J. Kim 91

Design erosion: problems and causes
J. van Gurp and J. Bosch 105

Availability analysis and improvement of Active/Standby cluster systems using software rejuvenation
K. Park and S. Kim 121

Visual requirement representation
D.-J. Chen, W.-C. Chen and K.M. Kavi 129

Software requirements validation via task analysis
H. Zhu, L. Jin, D. Diaper and G. Bai 145

Special Issue on Best practices in Software Engineering

Best practices in software engineering
H. Saiedian 171

Classification and evaluation of defects in a project retrospective
M. Leszak, D.E. Perry and D. Stoll 173

COTS-based software development: Processes and open issues
M. Morisio, C.B. Seaman, V.R. Basili, A.T. Parra, S.E. Kraft and S.E. Condon 189

Challenges of component-based development
I. Crnkovic and M. Larsson 201

Producing reliable software: an experiment
C. Smidts, X. Huang and J.C. Widmaier 213

An empirical study of industrial security-engineering practices
R.B. Vaughn Jr., R. Henning and K. Fox 225

Interprocess communications in the AN/BSY-2 distributed computer system: a case study
D. Andrews, P. Austin, P. Costello and D. LeVan 233
